

COVID-19 SUPPLEMENTAL Personal Packing 2020

- **Masks or Bandanas: a fresh one for each day you're on trail and in Ely.** You'll wear one while you're in town shopping or perhaps in the Guesthouse as needed, during our O/P meeting, during the shuttle to our entry point, and if/when needed in camp or other places as we paddle & portage in the BWCAW.
- **Nitrile or vinyl disposable gloves (optional).** If you feel the need, pack along a supply of your own. WWD will provide the option of gloves for food prep on the trail and in camp. If you're washing your hands, and using sanitizer you should be fine.
- **Hand Sanitizer!** WWD provides individual biodegradable bar soap to each camper, biodegradable liquid soap for dishes, and hand sanitizer for group use. However, you may want the extra convenience of bringing your own stash in your hip pack for travel days.
- **Disinfectant wipes (optional).** WWD packs a modest supply of 'baby butt wipes' in the TP stock for trail use. These are not disinfectant wipes. If bringing a small amount of your own disinfectant wipes gives you extra peace of mind, by all means do it. Be sure the container is protected within a ZipLock freezer bag...they may leak. Disinfectant wipes are NOT to be used on tents, tarps, or sleeping bags!

WWD packs a disinfectant spray bottle & wipes which are intended for specific uses with group gear only.

All used disposable gloves & wipes will be put into our group garbage. Please consider minimizing what you decide to bring. Good old hand washing is the very best defense!
